

## **Bird Feeder Recipes:**

### **Nectar Liquids:**

**Dissolve 450 gr. Brown sugar in 600 ml water. Refrigerate as this mix can ferment during hot weather. Small quantities (1 part heavy syrup to 2 parts water) put out every few days are best. Clean containers well before putting out each fresh mix. If you like, you can add a few drops of infant vitamin concentrate.**

### **Seed:**

**Parrot mixture from supermarkets or sunflower seed attracts native parrots if you are lucky enough to have them in your area.**

### **Meat:**

**Scraps of meat (and cheese) are welcomed by magpies, kookaburras and butcher birds if they live close to your home.**

### **Solid Food:**

**Try mixing equal parts of dripping, brown sugar, rolled oats and dried ground peas, or hang up some suet in an onion bag.**
